Audio Programmer with 3 years of professional experience building scalable audio systems, middleware integrations, and gameplay driven audio features across multiple shipped titles. Focused on core systems, VO pipelines, and internal tooling in shared technology teams supporting multiple games in parallel. Available for new roles immediately.

WORK EXPERIENCE

Audio Programmer

Feb 2023 – Feb 2026

[Resolution Games](#)

Stockholm, Sweden

Responsible for core audio systems, middleware integration, VO pipelines, and gameplay driven audio features across multiple shipped titles, working as part of a shared technology team supporting several games in parallel.

- Integrated and customized audio middleware (Wwise, FMOD) to support designer workflows and advanced runtime behavior.
- Designed, built, and implemented internal tooling that reduced sound design iteration time and improved asset integration reliability.
- Diagnosed and resolved complex audio technology issues in live production environments, supporting both designers and engineers.
- Designed and implemented gameplay connected audio systems for responsive, data driven behavior.
- Designed and maintained full VO pipelines, including dialogue trigger logic, timing/state frameworks, batch processing, and in-engine tooling for narrative teams.
- Provided technical guidance and code reviews for an audio programming intern, supporting onboarding and integration into production workflows.

Previously: *Gameplay / Audio Programmer Intern, Aug 2022 – Feb 2023*

PERSONAL PROJECTS

UE5 Spatial Audio Diffraction System

Unreal Engine 5, C++, MetaSound

Real-time diffraction ray tracer that places a virtual sound source at the point sound actually arrives from, instead of just attenuating through geometry. Async ray casting spread across frames, persistent edge caching, and distance-based lowpass/reverb driven by true path length.

SHIPPED TITLES

Demeo x Dungeons &

[Dragons: Battlemarked](#)

VO systems, ability audio logic, designer tooling

Spatial Ops

Weapon audio systems, VO logic, DSP states, gameplay driven audio features

Racket Club

Impact/interaction audio implementation and system support

Home Sports

SFX implementation and polish for key gameplay interactions

Gears & Goo

Audio integration and runtime support

EDUCATION

Game Programming (C++),

[The Game Assembly \(Higher Vocational Education\)](#)

Aug 2020 – Apr 2023
Stockholm, Sweden

Music, Songwriting,

[Kaggeholms Folkhögskola \(Folk high school\)](#)

Aug 2017 – Jun 2019
Stockholm, Sweden

SKILLS

Wwise, FMOD | C#, C++ | Unity, Unreal Engine | DAW (Reaper/Logic) | Sound Design | Version Control (Git/P4V/Plastic)
